

# Structured Cabling Solutions

at a glance

## MAKING COMMUNICATION EASY

Structured Cabling enables network connectivity, communications, operations, and management of your enterprise network. Structured cabling infrastructure integrates converged applications, cloud solutions, and mobility as well as delivering voice, data and video on a common communication platform.

NetVersant offers a broad range of end-to-end Structured Cabling Infrastructure Solutions and Services. Anything from voice, video, and multimedia is supported in a greenfield or legacy environment.

## COMMITMENT TO EXCELLENCE

NetVersant is a trusted advisor for vendor agnostic, purpose built platforms to address your communication business needs and boost productivity with a lower total cost of ownership.

- Network cabling partners delivering high performance copper and optical cabling solutions
- Access to experienced, vendor-certified technical solutions design and implementation from single site to nationwide multisite installations
- Experienced with HIPPA and Healthcare requirements
- RCDD (Registered Communications Distribution Designer) providing oversight to the design, implementation, integration and project management.

*Inspiring Technology Solutions*

## IMPORTANT BENEFITS TO YOU

Network Infrastructure, from an investment point of view, provides exceptional ROI benefits which include:

- 1. Network cable infrastructure will require minimal repairs and outlive other network components, future-proofing your infrastructure.**
- 2. Reduce construction costs when integrating with cable-delivery methods. Costs can also be reduced because any company moves, changes, and upgrade can be performed more effectively when using an open-office cabling approach.**
- 3. System problems are easier to isolate and fix, simplifying troubleshooting efforts.**

## WHY CHOOSE NETVERSANT

NetVersant is committed to excellence. As your trusted advisor, NetVersant aims to provide the best breed of purpose built platforms for all business communication needs. Our goal is to help boost productivity while lowering total cost of ownership.

### *NetVersant Customers Gain:*

- Access to experienced, certified technical support for IP and TDM solutions
- Design, implementation, and installation of systems for both single sites and nationwide, multi-location businesses
- Superior, professional service team to support the installed platforms and ensure system functionality
- Supportive team working to ensure your financial investments are always optimized
