Industry-leading Solutions, Superior Service

As a leading electronic security systems integrator, NetVersant offers superior turnkey capabilities and provides customized comprehensive solutions for single- and multi-location customers across the United States. From planning and design, to installation and commissioning, to project management and post-sales support, our exceptional team stands ready to assist your team.

Professional Services

Needs and Vulnerability Analysis To meet the demanding and often mission critical performance requirements placed on electronic security deployments, NetVersant performs an extensive and comprehensive needs and vulnerability analysis. With certifications such as CPP, MCSE, CCNA and CCIE, our professional staff possesses not only the skills required to perform holistic needs analyses, but also offers innovative, cost-effective solutions that help our customers leverage technology.

Design and Implementation State-of-the-art results are driven by NetVersant's expertise in systems design and technical implementation executed by the most highly trained professionals and technicians in the industry.

Return on Investment Calculations NetVersant's ROI analyses often serve as the basis for customers' buying decisions, particularly on enterprise-wide initiatives that involve solutions that increase ROI. Because we understand both the organizational and technological aspects of security, NetVersant is able to address ROI relative to operating costs in addition to technology upgrades.

Premier Service NetVersant has created a unique "NetVersant Experience" based on how we act and interact. We recognize that you — our valued customers — have high expectations, and we strive to provide consistent, superior service.

superior service capabilities

- ✓ Access control, including card access, smart card applications and biometrics
- ✓ Alarm monitoring/intrusion detection
- ✓ Intercom communications
- ✓ RFID/asset tracking
- ✓ Video analytics
- ✓ Wireless architecture design that complements and optimizes electronic security solutions
- ✓ IP-based solutions

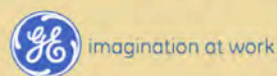

we are convergence

In the ever-converging world of video, voice and data, NetVersant offers multiple service lines to provide total communications solutions.

- Electronic Security Solutions
- IT Infrastructure Solutions
- VoIP/Telephony Solutions
- Wireless Mobility Solutions

Vendor partners

SONY

LENEL Lenel Systems International, Inc.

SYSTIMAX
SOLUTIONS

CISCO SYSTEMS

BOSCH

Honeywell

System Design, Network Integration and Installation

Access Control, Alarm Monitoring, Intrusion Detection

Enterprise solutions, biometric capabilities, proximity and smart card technology, visitor management systems, credentialing

Video Surveillance

Analog, digital and high-definition surveillance solutions, network video management systems, IP camera deployment and network optimization

Intercom Communications

Analog and digital intercom solutions, intercom over IP (VoIP), emergency assistance and nurse call systems

RFID/Asset Tracking

Active and passive tag technologies, physical security and supply chain monitoring, automatic vehicle identification

Video Analytics

Intelligent video analysis, maritime, port and border security, facility perimeter monitoring, real-time threat tracking, video forensics
