NetVersant Names Integral Technologies as Preferred Digital Video Line Provider

HOUSTON, Texas, April 26, 2005 □ NetVersant Solutions today announced that Integral Technologies has been selected as its preferred provider for digital video solutions for its small, medium and enterprise-class businesses. The announcement was made by Scott L. Fordham, president and chief executive officer of NetVersant.

Integral's full line of security products provides its customers with a complete security solution that offers forward and backward compatibility with existing systems. NetVersant is the leading national provider of comprehensive and integrated wireless convergence solutions, including wireless services, telephony systems, network infrastructure solutions and electronic security systems.

NetVersant's Electronic Security Systems (ESS) Division will now allow for Integral's DigitalSENTRY and MasterControl™ digital video management systems to be seamlessly integrated into the company's security product platform. Like Integral, NetVersant recognizes that system integration is the key to offering efficiencies in time management, cost and ease of use.

“With Integral’s cost-effective products, state-of-the-art features and quality support, NetVersant can maximize customer value and satisfaction, thereby supporting our number one priority,” commented Carey Boethel, vice president of NetVersant’s Electronic Security Systems Division.

Due, in part, to the integrated success of the DigitalSENTRY and DVX line of products, NetVersant has experienced significant growth in the area of security and has gained recognition as one of the premier ESS integrators on national, regional and local levels. In addition, NetVersant has been able to enhance and expand the capabilities of its current business partnerships.

NetVersant has seen the convergence of IT and security decision making shift toward the IT group and is well positioned to capitalize on the changes evolving in the marketplace. Both companies are facing these challenges by offering complete security solutions for all business sizes, providing products that easily integrate into existing systems, and keeping pace with customers’ growing demands.

“Both Integral and NetVersant are recognized as leaders in their respective areas,” says John Bohr, national account sales manager, Integral Technologies. “This established relationship allows both companies to build off of each other’s strengths and bring truly comprehensive solutions to customers.”

Integral’s enterprise-class DigitalSENTRY empowers any user to efficiently manage large amounts of video data from a security network. Utilizing the DS XPress and DS Enterprise systems, DigitalSENTRY offers exceptional features and tremendous time-saving capabilities. Encompassing more than 128 channels, the powerful DigitalSENTRY provides a full compliment of demand features, including remote audio support, Windows® XPe, ActiveAlert™ intelligent video analysis, Dual-Mode (Hybrid) IP camera integration and integrated IPIX 360° CommandView camera.

The DVX Digital Video Management System provides high performance digital video recording for a variety of small to medium security applications. With Integral's RemoteView software, authorized users can view live or recorded video via network or modem. DVX products include the DVX 1000, DVXi and DVXe digital video management systems.
