

Revolutionary technology. Two industry leaders. Superior solutions.

As the nation's premier provider of comprehensive and integrated inside-the-facility infrastructure solutions, NetVersant has fostered a strategic relationship with Anixter, the largest global distributor and logistics services provider of wire, cable and connectors for use in data, voice, video, electrical and electronic applications.

Notably, NetVersant is Anixter's first and only National Certified CCTP Installer. Together, NetVersant and Anixter are uniquely positioned to provide best-in-class electronic security system solutions.

A HISTORY OF LEADERSHIP

Anixter's widely acclaimed Levels program created much-needed standards for data cabling in the late 1980s when it categorized cable types based on performance into what is now known as Cat 3, 5 and 6.

Anixter is now bringing similar standards to the video surveillance market with CCTP (Closed Circuit Twisted Pair).

COMPREHENSIVE WARRANTY

When installed by an Anixter CCTP-AI (Authorized Installer), CCTP systems carry a three-year parts and labor warranty, ensuring trouble-free, standards-based operation. NetVersant is Anixter's only nationally-certified CCTP-AI, extensively trained and fully prepared for your video surveillance projects.

WORLD-CLASS INVENTORY

Anixter's \$500 million inventory encompasses 92,000 products in 100 warehouses across 40 countries. A constantly growing base of customers is served by tenured sales professionals who process 7,000 orders daily from 175 sales and service offices.

A CLASS OF ITS OWN

CCTP cable utilizes a radically different construction in order to handle signals that were never intended to run over UTP. The uniqueness of CCTP cable is reflected in its dual UL certification: CMP/CMR for Article 800 (communications circuits) and DP-3 for Article 645 (information technology equipment). The DP-3 rating covers CCTP cable for use with Class II or power-limited applications.

Importantly, this dual certification is unique to the CCTP system and has not been applied previously to any other system.

EXTENSIVE BENEFITS TO CUSTOMERS

- CCTP total cost of ownership is 30% less than traditional CCTV systems over the life of the system.
- The design and engineering of CCTP have paved the way for simpler IT security management and represents the first solution transitioning to the digital future.
- CCTP easily accommodates technological advances such as digital integration, IP-based networks and power over Ethernet.
- Moves, adds and changes (MAC) for a CCTP system can be up to six times less than the cost of a CCTV MAC.
- Additional cameras can be easily and cost-effectively mounted and counted when using pre-wired CCTP outlets.
- Existing copper or fiber backbones can be utilized, saving material and labor expenses.
- The CCTP system is supported by a unique extended warranty that covers parts and labor for up to four years on select products.

FAST FACTS

ABOUT ANIXTER INC.

www.anixter.com

- Anixter is the exclusive distributor of the CCTP system, positioning the company to address the explosive growth of the IT security market.
- In addition to its industry-leading CCTP solution, Anixter offers an extensive range of integrated supply and logistics services.
- Anixter is redefining distribution by constantly expanding its product offerings, technical expertise, logistics services and inventory systems.
- The company leverages its one-of-a-kind Global Distribution Network with key components that provide cost-effective solutions to customers where, when and how they need them:
 - Product & Technical Expertise
 - Integrated Supply and Logistics Services
 - Business-to-Business Electronic Systems
- Anixter's \$500 million inventory encompasses 92,000 products in 100 warehouses across 40 countries. A constantly growing base of customers is served by tenured sales professionals who process 7,000 orders daily from 175 sales and service offices.

ABOUT NETVERSANT SOLUTIONS

www.netversant.com

- NetVersant offers a one-of-a-kind customer opportunity with Anixter: One point of contact for custom turnkey solutions.
- As the leading national provider of comprehensive and integrated network infrastructure solutions, NetVersant provides a complete range of voice, video and data communications services: Local and wide area network infrastructure, electronic security systems, wireless network installations and high-end telephony systems and applications.
- From planning and design, to installation and implementation, to certification and ongoing operational integrity, NetVersant develops innovative solutions that draw upon Anixter's distribution and logistics capabilities, ensuring a cost-effective, high-performance solution installed to exact specifications.

ANIXTER + NETVERSANT = OPPORTUNITIES FOR YOU

The NetVersant/Anixter relationship offers one-of-a-kind opportunities for customers who recognize the value of this solid partnership:

- the time-proven histories of these industry leaders,
- the experience of working together on single-site projects and multi-location national accounts,
- superior talent,
- complementary product platforms,
- second-to-none credentials,
- logistics savvy, and
- unmatched purchasing power.

In the ever-converging world of voice and data, NetVersant offers multiple service lines to provide total communications solutions:

- **Electronic Security Systems**
- **Network Infrastructure**
- **Wireless Network Installations**
- **Voice Technologies**

Under NetVersant's Assurance Process, customers are offered a full range of services within each of NetVersant's core solutions, from business analysis to planning and design, implementation, maintenance and support.

NetVersant offers the key factors on your decision-making checklist:

- ✓ national coverage
- ✓ greater control
- ✓ efficiency
- ✓ reliability
- ✓ accuracy
- ✓ simplicity
- ✓ consistency
- ✓ uniformity
