

# Reliable In-Building Wireless Solutions

*Distributed Antenna Systems take In-building Wireless to the next level ...*

NetVersant helps enterprises accelerate their success by ensuring that employees are connected real-time to information, decision makers and customers – whether they're at their desk or on the move anywhere in-building or across your entire business campus.

Leading Analysts estimate that well over half of employees in enterprises today are mobile workers. They need to be on the move on-site and off-site. Yet many building and campus environments simply aren't conducive to wireless solutions, resulting in:

- Inconsistent coverage
- Poor call quality
- Disconnections and lost calls

These challenges also create risk for on-site emergency responders. Our Distributed Antenna System Solutions are designed to fit your business and ensure coverage and performance – enhance patient care, customer experience, occupancy rates, service response times or customer satisfaction.

**Enhanced Coverage and Reliability for:**

- Hospitals and Healthcare Facilities
- High-rise Buildings
- Campus Environments
- Stadiums and Coliseums
- Manufacturing Facilities
- Malls and Shopping Centers
- Conference Centers

*Wireless connectivity solutions that fit...*

*...into your business strategy... Speed access to information, decision makers and response to customers. Communicate anytime, anywhere!*

**A Distributed Antenna System** is a network of strategically placed antenna nodes that improve coverage, reliability and call quality in diverse or complex geographic areas, buildings or campus environments.

This new and powerful approach to wireless networks leverages groups of antennas operating at lower power and increased reliability. It is a perfect fit for the distinct challenges of stadiums, campus locations, large-scale plant environments and unique building designs.

**Ensure Connectivity and Quality:**

- Site survey, engineering and design analysis
- Regulatory compliance and documentation that assists planning and budgeting
- Quality Assurance, Sweep Testing, TEMS Services
- Monitoring, tracking and troubleshooting

**A proven track record from a premier service provider ensures confidence that you get results first time, every time.**

Connecting people with the information they need to improve their business...

### Why Enterprises Choose NetVersant

**At NetVersant we *Inspire Technology Solutions*. Our objective isn't to sell you what we have, but instead to design and deliver what you need. That means:**

***We turn creativity into connectivity.*** Technology is changing quickly and business is competitive. If you're not creative in leveraging technology to connect people with information, the competition will leave you behind. We don't just sell products; we deliver innovative solutions, managed and professional services.

***We customize solutions to fit your business.*** Our Solution Architects operate on the premise that your solution is unique to your business. We understand the integration between technology and business process and leverage that knowledge to help clients improve profitability and customer relationships.

***We deliver exceptional service with passion:*** A solution isn't complete without a best-in-class support model. Service is not an afterthought or a reactive mechanism to recover, but an integral part of our solutions. It ensures ROI achievement.

***In order to Inspire Technology Solutions, we begin by inspiring our employees to embrace innovation, cultivate relationships and possess a relentless passion to help clients succeed. Our goal is to Accelerate Your Success!***
