

Inspiring Technology Solutions

NetVersant Solutions is a premier provider of communication and networking solutions to enterprises of all sizes across the nation. Experienced teams of certified experts manage the technology that allows enterprises to communicate and collaborate anytime, anywhere and they deliver the intelligent infrastructure that consistently ensures operational efficiency and real time sharing of information.

NetVersant focuses on helping our clients **accelerate success** by understanding their business and integrating technology solutions into their business strategy. The result: business growth and customer loyalty.

Technology Practice Areas:

- Enterprise Communications
- Intelligent Network Infrastructures
- Enterprise Mobility Solutions
- Integrated Security Solutions
- Carrier Support Services

“Our success is founded on a relentless focus on meeting client needs while exceeding their service expectations. We bring a unique approach to inspiring technology solutions that fit seamlessly into the fabric of their business strategy and technology infrastructure.”

Dale Booth
Chief Executive Officer

From its state of the art Network Operations Command Center, NetVersant provides 24x7 nationwide infrastructure monitoring and onsite remediation support through a network of dedicated employees and local service partners.

Leveraging deep relationships with industry leaders, like Avaya, Aruba, Cisco, CommScope, Corning, Ruckus and ShoreTel, NetVersant integrates industry leading technology with its best-in-class services – a powerful solution.

Our technical consultants deliver solutions in Unified Communications, Wireless and Distributed Antenna Systems, Video Surveillance and Access Control, Structured Cabling, and Carrier Support Services. We design, build, secure and service the integrated platforms and networks that ‘connect’ technology, decision makers, information and results.

Why Smart Companies Choose NetVersant

- Cost-effective communication solutions positively impact their bottom line
- Improved collaboration means quicker and more informed decisions
- Speed of access to information drives increased end-user productivity
- Secure, intelligent network infrastructure ensures flexibility and scalability
- Access to the best technology solutions through relationships with industry leaders
- Security solutions protect their information, assets, resources and employees
- Confidence in the power and reputation of an experienced technology partner

Connecting people with the information they need to improve their business...

Technology Practice Areas

Enterprise Communications

Optimize communications by integrating voice, data and video – IP Telephony, Contact Center, Multimedia Collaboration, Unified Messaging, Presence...

Intelligent Network Infrastructures

Environmentally efficient data centers and intelligent power, cooling, fiber and copper connectivity solutions to build and manage network systems that provide awareness from core to edge for voice, data and video.

Enterprise Mobility Solutions

Enable the mobile worker to access information or collaborate in real time, anytime, anywhere. Wireless Networks and Distributed Antenna Systems support growth and enhance the customer experience.

Integrated Security Solutions

Physical security solutions compliment and protect technology and infrastructure assets. Advanced Video Surveillance and Access Control technology provides clients complete situational awareness and protects employees and technology investments.

Carrier Support Services

Contingent staff augmentation of professionals, permanent recruiting and placement, on-site vendor management and project solutions including network design, implementation and management in support of Carrier Class technology.
